GTC appoints Brough as Head of Sales

GTC, the nationwide provider of utility infrastructure to the new-build market, has appointed Tom Brough as Head of Sales. This key appointment is testament to the fact that GTC is determined to continue to support developers through the recession and has robust plans for the future.

Tom has worked for GTC since November 2007 as Product Manager and Regional Sales Manager for the East Midlands. As head of Sales, Tom will drive the important task of strengthening and developing GTC's loyal customer base by ensuring that the company's products and services consistently match the client's needs. Whilst managing and supporting GTC's regional sales managers, Tom will oversee the marketing process, and will directly manage the sales process for strategic projects.

Clive Linsdell, Managing Director of GTC says: "We are delighted to have been able to offer Tom the position of Head of Sales. GTC is committed to providing the highest possible levels of service and we pride ourselves on our strong working relationships with our clients. We feel that Tom's wide experience and impressive knowledge makes him the ideal person to continue to forge close and successful partnerships with developers and on-site teams alike."

Prior to joining GTC, Tom gained strong experience in environmental and sustainability issues and the energy industry whilst working for the East of England Development Agency and the Energy Information Centre. Tom's background is in energy procurement, risk management and business development. Among his interests Tom lists golf, he has a handicap of 12 , and the enthusiastic coaching of the Bury St Edmunds under 13s rugby team.

Notes for Editors

GTC is a nationwide provider of utility infrastructure to the new-build market and provides cost-effective Gas, Electricity, Dual Fuel and Multi Utility solutions.

Over the past decade, GTC has become one of Britain's biggest providers of utility infrastructure. GTC works with all house builders, consultants and major developers in the British mainland new-build market. Currently over 500,000 homes and commercial premises are connected or contracted to be connected to a GTC network.

Under its two Ofgem-licensed businesses - GTC Pipelines Ltd (for gas) and The Electricity Network Company Ltd (for electricity) - GTC owns and operates networks in perpetuity, whether built by its own construction division or by other accredited infrastructure providers. Because of this on-going responsibility, GTC ensures that exacting standards are adhered to from the outset.

GTC holds all four Lloyd's utility technical accreditations:

- Water Industry Registration Scheme (WIRS)
- Multi Utility Recognition Status (MURS)
- Gas Industry Registration Scheme (GIRS)
- National Electricity Registration Scheme (NERS)

GTC is owned by Prime Infrastructure, a company operating a diverse portfolio of quality assets worldwide.
